ΡΑΦΙΑ ΡΥΘΜΙΖΟΜΕΝΟΥ ΣΥΣΤΗΜΑΤΟΣ

The image contains three technical line drawings. On the left is a detailed view of a shelf bracket, showing its L-shaped profile with a vertical section featuring a series of rectangular slots for adjustable shelving. To the right of the bracket are two different shelving unit configurations. The top unit is a tall, narrow rack with five horizontal shelves, each supported by the bracket shown on the left. The bottom unit is a wider, shorter rack with three horizontal shelves, also using the same bracket system. Both units have a base rail with small wheels or casters for mobility.
